

Stata 16 SE for McGill Students and Staff for the Fall 2020

Since access to the campus is limited during the COVID-19 pandemic, the Faculty of Arts is making available STATA/SE version 16 for use in statistics courses as well as for research purposes during the Fall term. This way, students, instructors and researchers can use STATA without being on campus.

Essentially, this is quite easy and is done in two steps: First, students just need to download the version of STATA/SE they need (i.e. PC, Linux, or Mac) from the McGill webserver. Second, they will need to install it on their computer. Once it is installed, students then will need to enter some information (serial number, code, authorization #) to be able to use STATA. Once this is entered, students should then be able to use STATA until the end of December 2020.

Information for Step 1 :110007742

So the file to install Stata is available at the link below. Use your McGill id and password to access it

https://webfolders.mcgill.ca/install/Stata_16/

Download the appropriate version for your computer (Linux, Mac or Windows) by choosing the appropriate directory.

Information for Step 2

Having downloaded the appropriate STATA file, you now need it to install it using the install application. Once this is done, the first time you run STATA you will need to enter the information of the License and Activation Key for the version that the Faculty of Arts purchased. Namely, you will be required to enter the serial number, the code and the authorization. (see below "*License and Activation Key Stata Software*" where to find the corresponding numbers to enter in STATA)

Once this is done, STATA is ready to be used.

License and Activation Key Stata Software

*This License and Activation Key is an important document. **Three pieces of information on this document — the serial number, code, and authorization — will be required during the installation process of the software you have licensed from StataCorp LLC (“StataCorp”), as further described below.***

This document is valuable proof of purchase for your software license. You should store this document in a safe place for record keeping.

*Licensed software: Stata/SE 16
License type: Unlimited-user Network
License term: Expires 31 December 2020*

Serial number: 401609324540
Code: Lar4 gorq ppoh a4xL avgt xsel dq1b iosw y\$28 s
Authorization: 840w

*L represents the letter L 1 represents the number one
o represents the letter o 0 represents the number zero
Note: When you type your code and authorization into the computer, you may type in lowercase or uppercase letters; it does not matter. You may also omit or add spaces as you wish.*

Notice to user: Please read the following carefully. By installing the software and entering the Activation Key set forth in this document into your computer and unlocking the software, you confirm that you agree to be bound by the terms and conditions of StataCorp’s then-current Software End-User License Agreement (as amended from time to time) (“Software License”). If you do not agree to be bound by all the terms and conditions of the Software License, do not enter the codes in this document or otherwise install or use the software.

The terms of the Software License can be accessed on the StataCorp website at the following URL: <http://www.stata.com/order/end-user-license-agreement>. An electronic copy of the Software License is also included on the installation media. This software is protected by United States copyright law and international treaty provisions.
